

How to flash a N52 engine using the new throttle maps

1. After you flash the DME take out the key and wait for 15 seconds
2. Put back the key and press the start button (the dashboard need to be light up)
3. Wait for 30 seconds and then press the throttle 3 times to the floor.
4. Take out the key one more time and wait for 15 seconds again.
5. Put the key back and start the car.
